Introduced by Assembly Member Nestande

February 13, 2009

An act to amend Sections 2079 and 2082 of the Health and Safety Code, relating to vector control.

LEGISLATIVE COUNSEL'S DIGEST

AB 288, as introduced, Nestande. Vector control.

Existing law, the Mosquito Abatement and Vector Control District Law, authorizes the establishment of mosquito abatement and vector control districts governed by a board of trustees. The board of trustees is required to provide for regular audits of the district's accounts and records. The law also authorizes the district to levy special benefit assessments to finance vector control projects and programs.

This bill would require the board of trustees to adopt a formal, written response to any irregularities or accounting issues raised in the audit and provide this response to the appointing authority of each member of the board of trustees. The bill would also require the district before it levies special benefit assessments to provide specified notice to the appointing authority.

By imposing new duties upon a mosquito abatement and vector control district, this bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The county may deduct an amount not to exceed its actual costs incurred for collecting the special benefit assessments before remitting the balance to the district.
